PROJECTS

Portfolio Website

This website is made by using **HTML**, **CSS** & **javascript**. The whole design is made with HTML and CSS. Using javascript, a simple login section is there where only the teacher can enter the website and the rest of the design section will be visible after the person log in with correct information.

https://github.com/ShykatDev/Portfolio_Web.git

BankList Website

Using **javascript functionalities** to make this website more interactive. This is a real-life project which is also designed with **HTML** and **CSS**.

<https://github.com/ShykatDev/Banklist.git>

Real Estate Website

This website was made for a client of a **freelancing platform**. This is a one-page website **Bootstrap** is used for making background sliders and the rest of the design was made by only **HTML** and **CSS**.

(Please switch branch from main to master to see the content)
